## Team Building

Empower your existing recruiters: Recruiters spend most of their time sourcing candidates and doing administrative tasks, leaving little time for actually recruiting.

To maximize your return from your costly in-house recruiters, provide them with a team to handle all of the lesser tasks that often consume their time and focus. This will allow your on-shore recruiters to do what they do best: interact with clients and close deals.

Recruiting teams can include any of the following:

- Recruitment Lead
- Recruiters
- Sourcing Specialists
- Recruitment Coordinator
